

ASPHALT EQUIPMENT FOR SKID LOADERS

Our **ASPHALT EQUIPMENT FOR SKID LOADERS** are specific machines designed to be used with skid steer loaders, backhoe loaders or tool carriers for hot emulsion treatment and asphalt paving. They are the simplest and most economical solution to spray & pave using only one machine in all types of road construction sites, from small to large, guaranteeing reliability in every single job.

SPRAYTANK H-G – HEATED MINI THERMO SPRAYER

SPRAYTANK H-G is a **MINI HEATED EMULSION SPRAYER FOR MINI LOADERS, BACKHOE MACHINES OR TOOL CARRIERS** designed for simple hot emulsion spraying, it is available in models of various sizes. Designed to work with the hydraulic system of the carrier machine, they save personnel and time, with quality spraying, thanks to the possibility of always having emulsion heated to the appropriate temperature thanks to a gas heating system. The machine is available with a wide range of options to have a complete machine for every need, to operate on pavements, urban excavations, or normal road maintenance, for country and dirt roads or to be used as a "patcher" with hopper for granulates in the combined manual laying of multilayer granulates with hot emulsion & gravel.

HIGH FLOW HEATED EMULSION PUMP WITH BYPASS driven by the hydraulic system of the carrier machine - **SPRAYING SYSTEM CLEANING SYSTEM - MANUAL SPRAY NOZZLE** with res control - **GAS HEATING SYSTEM**, with burner with manual piezo ignition and flame control with thermocouple - **RES SYSTEM** to continuously mix and heat the emulsion in the tank to the appropriate fluidity and temperature before spraying, avoiding the formation of funds inside and obtaining the self-cleaning machine - **SPRAY HOSES** for high pressures connected.

MODELS AVAILABLE WITH CAPACITY OF 200 – 400 – 600 - 800 LTS

OPTIONALS: **H-GA VERSION** with automatic gas heating system - **H-DA VERSION** with automatic 12v diesel heating system - **THERMAL INSULATION** in fiber ceramic covered in steel - **DPX & COMBY** Versions with separate or built-in water tank - **RSP BAR MANUAL MULTI NOZZLES** L= max 1.8 or 2.4 m - **RSPT MANUAL MULTI NOZZLE BAR** on adjustable pantograph L= max 3.0 m - **WPSC CLOSED CIRCUIT CLEANING SYSTEM** without dispersion of liquids in the environment - **RSC RES ELECTRIC CONTROL** to regulate the spraying on the boom directly from the cabin of the carrier machine - **AUTOMATIC WINDER** for spray lance - **LED WORK LIGHTS** - **LED FLASHING LIGHT** - **SPECIAL PAINT**.

TRACER 610 – LATERAL ASPHALT MINI PAVER

TRACER 610 is a **LATERAL ASPHALT MINI PAVER FOR SKID LOADERS, BACKHOE LOADERS, TOOL CARRIERS**, designed to be powered by the hydraulic system of the carrier machine and loaded by any truck in its large front hopper. Particularly suitable for works normally manually done, it completes the fleet of all road contractors, to be used particularly to pave pavements, cycle tracks paths, pedestrian areas, car parks and roofs, garden and countryside avenues, patching potholes, excavations and mini trenches of optician fiber. Its particular design allows to use milled asphalt, sand, gravel and cement conglomerate to refill the excavation, saving costs of time and personnel in all maintenance work normally manually performed.

*patent applied

HYDRAULIC SYSTEM DRIVEN BY THE HYDRAULIC SYSTEM OF THE CARRIER MACHINE - FRONT HOPPER with two independent doors $L = 2600$ mm for loading from any truck - **FEEDING AUGER** hydraulically controlled - **LATERAL SCREED PLATE RWL 610** hydraulically extendable, heated by gas, with transversal inclination register and soles in special steel - **CABLE REMOTE CONTROL** for the control of all machine functions by operators on the ground or from the machine cabin, with indicators and switches.

LAYING WIDTH: 60/100 Cm. (max** 1.40/min** 0.30) – **THICKNES: 0/15 Cm.** (**optional on request).

OPTIONALS: MECHANICAL EXTENSIONS for max. up to 1.4 m – MECHANICAL REDUCTIONS for min. of 0.3 Mt - HYDRAULIC VIBRATION 60Hz - REMOTE RADIO CONTROL - ALS AUTOMATIC LEVELING SYSTEM - AFS AUTOMATIC FEEDING SYSTEM - CAMERA & MONITOR FOR VISUAL CONTROL OF THE PATH from the cab of the carrier machine - LED WORK LIGHTS - LED FLASHING LIGHT - SPECIAL PAINT - AUTOMATIC HEATING CONTROL OF THE SCREED PLATE to control the temperature of the screed soles.
